
Data Retention Policy

“Pursuant to the NASA Plan for Increasing Access to the Results of Scientific Research (“NASA Plan”), the Wisconsin Space Grant Consortium will provide public access to digital data sets, research results, computer codes, and other non-proprietary factual material necessary to validate published research findings arising from WSGC-funded work. These materials will be available as supplements to the Wisconsin Space Grant Consortium’s online journal, Proceedings of the Wisconsin Space Conference. All non-student research projects supported by the WSGC will be subject to the data retention and access provisions stipulated in the NASA Plan. It is the responsibility of the researcher to retain for submission all data, computer code, and relevant non-proprietary factual material for inclusion as “supplementary file(s)” to be associated with the required research report submission to the Proceedings of the Wisconsin Space Conference.”
